

X-keys® MWII Desktop USB Specifications (XD-293-USB-R)

- 20 Programmable Keys
- Clear, removable key caps for applying and changing legends
- Includes X-keys MacroWorks II Software
- Rugged construction
- Durable Cherry® Mechanical switches for a long, reliable life

The X-keys® MWII Desktop uses X-keys MacroWorks II software to record key commands from the keyboard and send them to applications on the computer. Any sequence or combination of keystrokes from a standard keyboard may be assigned to any key on the X-keys. Mouse commands (click & scroll) may also be programmed. Simple, intuitive steps allow even non-technical users to program the X-keys instantly. Programming files may easily be copied and shared.

The USB X-keys may also be operated in Memory Resident Mode, saving all programming in an onboard non-volatile memory and emulating the PC keyboard port (PS/2) version of the X-keys.

Specifications

Operating System	WINDOWS: 2000, XP, Vista MAC: OSX
Included Software	WINDOWS: MacroWorks II MAC: iKey for X-keys (Mac)
Switch Type	Cherry type MX mechanical switch, low profile tactile feel, 3/4" (19 mm) on center
Number of Keys	20 single keys -- with second layer: 40 programmable keys
