

X-keys USB 3 SWITCH INTERFACE

Any switch can trigger an action on your computer or tablet. Connect up to three switches to the X-keys USB Switch Interface and program each switch with a function. Any keyboard shortcut your software uses can have a designated switch (copy, paste, save, open, close). Switches are easily set up to launch applications, open files, or type short lines of text like names, addresses, and account numbers. Switches are connected via Assistive Technology standard 3.5mm (1/8") phone plugs.

- Perfect for Assistive Technology Users
- Mates perfectly with our three trigger switch (shown below)
- One TRRS (Tip-Ring-Ring-Sleeve) port connects up to three switches
- Programmable Keyboard, Mouse, and Joystick commands
- Easily create your own macros
- Programs in a language every computer user understands: keystroke

MSRP: \$49.95
