X-keys XK-12 Touchpad

The XK-12 Touchpad offers twelve user definable keys fit in a small footprint equally suitable for desktop or hand-held operation. The design of the clear key lenses keep your printed or hand written legends securely in place and protect them from wear while making it quick and easy to update them. The full travel keys have the same feel as a standard keyboard and angled feet give the unit a slight tilt for better viewing of the key legends. Blue and red addressable backlighting enhances key identification in low light environments.
