

Date: June 8, 2006

Name of Product: X-keys Stick PS/2

Contact for more Information: info@piengineering.com or 1 (517) 655-5523

Summary Table

Voluntary Product Accessibility Template™

| <i>Criteria</i> | Supporting Features | Remarks and explanations |
|---|---|--|
| Section 1194.21 Software Applications and Operating Systems | Not Applicable | No software required for this product |
| Section 1194.22 Web-based Internet Information and Applications | Not Applicable | Product is hardware |
| Section 1194.23 Telecommunications Products | Meets all requirements pertaining to mechanically operated controls or keys | Product may be used as accessible interface to telecommunications products |
| Section 1194.24 Video and Multi-media Products | Not Applicable | Product is input peripheral |
| Section 1194.25 Self-Contained, Closed Products | Not Applicable | Product is computer accessory |
| Section 1194.26 Desktop and Portable Computers | Meets all requirements pertaining to mechanically operated controls or keys | Product serve as auxiliary keyboard for desktop and portable computers |
| Section 1194.31 Functional Performance Criteria | Meets all requirements | Product supports users with a broad range of disabilities. |
| Section 1194.41 Information, Documentation and Support | Meets all requirements | Information available in print, html, flash tutorials, and direct phone support. |

**Section 1194.23 Telecommunications Products – Detail
Voluntary Product Accessibility Template™**

| <i>Criteria</i> | Supporting Features | Remarks and explanations |
|--|----------------------------|---------------------------------|
| (a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use. | Not Applicable | |
| (b) Telecommunications products which include voice communication functionality shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols. | Not Applicable | |
| (c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs. | Not Applicable | |
| (d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall | Not Applicable | |

| | | |
|--|--------------------|---|
| provide sufficient time for the user to indicate more time is required. | | |
| (e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays. | Not Applicable | |
| (f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided. | Not Applicable | |
| (g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use. | Not Applicable | |
| (h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided. | Not Applicable | |
| (i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product. | Not Applicable | |
| (j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery. | Not Applicable | |
| (k)(1) Products which have mechanically operated controls or keys shall comply | Meets Requirements | Key layout allows user to identify keys tactilely before pressing them. |

| | | |
|---|--------------------|---|
| with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys. | | |
| (k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum. | Meets Requirements | Keys require less than 5 oz. force to activate. Programming switch requires less than 5 oz. to activate. |
| (k)(3) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character. | Meets Requirements | Key repeat may be turned off. If repeat is on, rate is determined by the Operating System. |
| (k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound. | Meets Requirements | Programming switch indicates position visually and is discernable through touch. Additional layer and programming status indicated by LED indicators. |

Section 1194.31 Functional Performance Criteria – Detail Voluntary Product Accessibility Template™

| <i>Criteria</i> | Supporting Features | Remarks and explanations |
|---|----------------------------|---|
| (a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided. | Meets all requirements | Programming and operation may be performed by visually impaired or blind users. |
| (b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided. | Meets all requirements | Key caps support key legends to fit entire surface of key. |
| (c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided | Meets all requirements | Programming and operation do not require hearing. |
| (d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided. | Not applicable | |
| (e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided. | Meets all requirements | Programming and operation do not require speech. |
| (f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions | Meets all requirements | Keys can be operated by users with limited strength and reach, and do not require fine motor control or simultaneous action. Keys up to 1-1/2" x 1-1/2" are available as an |

| | | |
|---|--|---------------------|
| and that is operable with limited reach and strength shall be provided. | | optional accessory. |
