

# X-keys<sup>®</sup> SE Button Panel USB (XK-259-BP)

- 34 Programmable Keys
- Output connection: USB plug
- Includes Software Development Kit (SDK)
- Zoom/rocker switch and 4 button/panning pad
- Two long legend strips fit under the panel to identify each of the 28 buttons

The *X-keys* Button Panel USB utilizes the same proven hardware as the X-keys Programmable Keyboards. It provides a clearly labeled, physical location for complex or redundant functions so you don't have to think about them.

The X-Keys Button Panel USB device is capable of direct interaction with your PC based application via SPLAT Mode. Our SPLAT Mode Software Development Kit includes code examples in Visual Basic, C Builder, and Visual C.
