

Y-mouse Dual Serial Mouse Adapter (WHYM-0001)

- ◆ Accommodates right and left-handed users by placing mice on both sides of a computer
- ◆ Switching between devices helps avoid repetitive motion problems
- ◆ Daisy chain to attach even more pointing devices at a time

Use 2 pointing devices from one serial port! Simultaneously connect two compatible pointing devices such as standard mice and trackballs.

The *Y-mouse* Dual Serial Mouse Adapter works with all systems that support a serial mouse. Both devices need to use similar mouse protocol. Trackballs, Touchpads and Mice are all relative coordinate devices that use similar mouse protocol.

Specifications
